Re: Status of Large Mining Operation Notice of Intent. Cargill Salt Inc. Timpie Salt Plant,  
M/045/030  
Tooele County, Utah

Reply to items listed in DOG&M letter dated 12/2/94

State - Most of the roads in plot B would have a post mine use provided the facilities in plot B have a post mine use. The western most roads in Plot B which accesses the pump station would not seem to have a post mine use after reclamation of the site.

- ① Reply - The roads in the western most part of Plot B are used to access the Timpie water system pumps. This water is used for process water, fire protection and sanitary use, for all the facilities in Plots A & B. Therefore if the facilities in Plots A & B have a post mine use the water system to operate, maintain and fire protect the facilities will have to be accessed by these roads.

---

State - Post mine use Plots A & B...

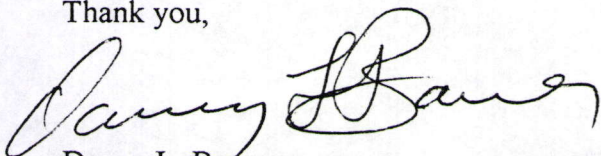

- ② Reply - Document from Tooele County Engineer, interested in post mine use of facility in Plots A and B.

---

State - Division recommends a 12 inch depth of soil in Plot C.....

- ③ Reply - The closest public (BLM) barrow pit is 7 miles away west down Rowley Road and the closest private pit is 5 miles away south down Skull Valley Road. Estimation of the cost of the soil was included in the draft of M/045/030.
